

Preface

Special Issues in Honor of Professors Xiaochun Rong

This is the first of two special issues in honor of Xiaochun Rong, distinguished Professor at Rutgers University, recognizing his profound contributions to Riemannian geometry and geometric analysis. The first issue begins with a brief summary of Xiaochun's mathematical work, written by Yusheng Wang and Shicheng Xu, Xiaochun's former PhD students and collaborators. Both issues include articles on diverse topics in Riemannian geometry and geometric analysis by experts many of whom have been inspired or influenced by Xiaochun's research.

It has been our honor and privilege to serve as editors of the special issues, and we wish to thank all authors for their contributions. We are also grateful to Xiaochun for this opportunity.

Editors of the Special Issue

Xianzhe Dai (Guest Editor)

Fuquan Fang

Bo Guan

Chao Xia

Zhenlei Zhang (Guest Editor)
